1. The Thermoelectric power station, Ovidiu II, (located on the Danube-Black Sea Canal) was ready for use in early August 1952. Materiel for this station was brought from the Soviet Union and the satellite countries. About sixty Soviet engineers and two hundred technicians worked on it, as well as a labor force estimated as having at times reached 2,000. German specialists were brought in from East Germany.
2. The station was to be in use by the second half of August 1952.
